

INSPIRING A VIBRANT COMMUNITY OF NURSING

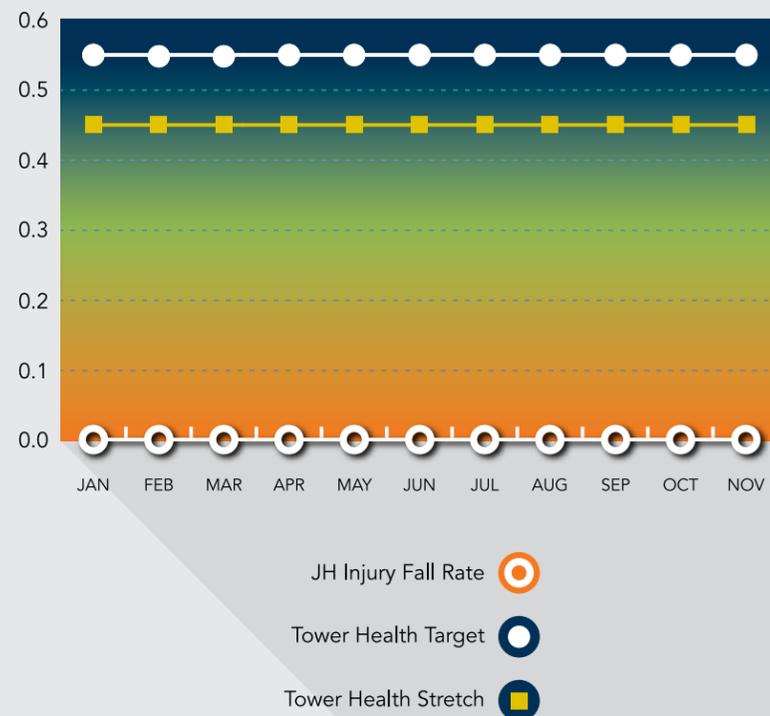

JENNERSVILLE HOSPITAL NURSING QUALITY OUTCOMES 2018

Jennersville Hospital Department of Nursing embarked on a journey this year to create a culture of shared governance, shared ideas and shared learnings to advance the quality. As we develop our interprofessional shared governance model woven into our professional practice model, we remember that patients and their families are at the center of the care we deliver. We are excited about the technology, the opportunity to participate in evidence-based performance improvement projects and access to tools and resources.

ZERO INJURY FALLS!

Jennersville Hospital nurses re-energized focus on fall prevention and transitioned to a collaborative, interprofessional fall team that includes nurses, physical therapy, emergency room staff, a pharmacist, and respiratory therapy. The group is using the principles of high reliability organizations to assess interprofessional fall prevention strategies to assure that patient safety remains a top priority.

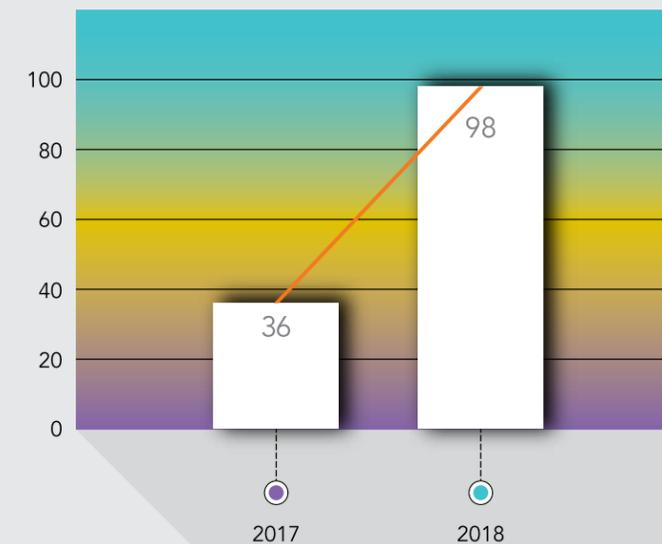

Jennersville Hospital Injury Fall Rate 2018

IMPROVED FIRST CASE START TIME

The OR went from a 36% FCST to 98% FCST by leveraging the Perioperative Improvement Meeting and the Department of Surgery Meeting.

Jennersville Hospital % On Time First Case Start

ZERO CAUTI RATE SINCE JUNE 2012!

- Strong collaboration with hospitalist and ancillary partners
- Hardwired bedside shift report
- Patient case reviews with care managers and pharmacists

ZERO VENTILATOR ASSOCIATED PNEUMONIA (VAP) RATE!

The Nurses in the Intensive Care Unit at Jennersville Hospital work in tandem with our Respiratory Therapists to care for patients receiving ventilator support. This relationship and close attention to both oral care, suctioning, and early extubation has yielded an overall decrease in our length of stay.

VAP free since May 2014; free of ventilator associated events (VAE) since February 2015.

PATIENT SATISFACTION

ED Nurses were ranked in the 99th percentile for patient satisfaction for CAHPS domain of Communication with Nurses.
